

*The **Grote ECO team** believes that by using the empowerment of our community, an environmentally sustainable society can be attained.*

*Further to this, such empowerment must come from within to achieve total and holistic success.*

*The **Grote Street Business Association's Grote ECO ~ Trading Towards Sustainability Program** addresses the issues of our local community in partnership with Local and State Government, Corporate bodies and other agencies.*

*These partners are taking responsibility for the development of a sustainable society that will flourish, providing marketable resources and programs and above all showing what a committed community can achieve on a global scale.*

*This eco-trading and living program will address all areas of environmental responsibility and sustainability and introduce structures to manage new initiatives.*

**Strategic Partners  
currently committed  
to projects of**

March 2003
